HTML Introduction

HTML is the standard markup language for creating Web pages.

What is HTML?

- HTML stands for Hyper Text Markup Language
- HTML is the standard markup language for creating Web pages
- HTML describes the structure of a Web page
- HTML consists of a series of elements
- HTML elements tell the browser how to display the content
- HTML elements label pieces of content such as "this is a heading", "this is a paragraph", "this is a link", etc.

HTML stands for *Hyper Text Markup Language.* It is used to create a web pages and applications. This language is easily understandable by the user and also be modifiable. It is actually a Markup language, hence it provides a flexible way for designing the web pages along with the text.

HTML file is made up of different elements. **An element** is a collection of *start tag, end tag, attributes and the text between them*.
